

March 10, 1976

make a decision if they want to kill a bill or if they want to leave it in committee that is their privilege. But, for the body out here to act on a bill, it seems to me to be out of place. Again, I say that that should be the committees action. I think that we ought to proceed. We have a lot of appropriation bills to work on, a lot of serious bills here. I would hope that we would get at our own business and start proceeding. Thank you.

PRESIDENT: Senator Dworak.

SENATOR DWORAK: Mr. President this bill now for two years has been deadlocked in committee and probably for some good reasons but apparently a solution hasn't been hammered out in this committee and I think that it is time to bring it out on the floor and let the body collectively work to a solution that would be favorable to everyone concerned. Obviously the solution isn't going to come from where the bill is right now. The people in the 22nd Legislative District now for two years have asked me what is happening on this bill? What are you doing on this bill. We are concerned about the litter in the ditches. Senator Skarda mentioned this morning about the sack of cans at his door. Many rural people find these cans every morning in their ditches, every morning. It is time to get this out on the floor and force a solution to this on the floor through the Legislative process. I would urge very strongly that now is the time to get it out, hammer it out and see if we can't put together a solution that would be amenable to all parties and would urge that we would raise this bill from committee and get to work on it and quit ducking our responsibility on this particular measure. Get it out and face the problem and come up with a solution.

PRESIDENT: Senator George.

SENATOR GEORGE: Mr. President, I would like to support Senator Fowlers request to get LB 505 on the floor. I do get the same questions in my district that Senator Dworak just mentioned. People ask me and they have asked since last year what are you going to do about that litter along the roadways. They are asking me now come back to the district and wait until the snow melts and look at the ditches. Something has to be done about it. I want to remind you that there are a variety of organizations that support this bill. I have support from Chambers of Commerce and I want to remind you that the Farm Bureau also had a resolution here supporting this bill and people in my district want that litter off of the roads. We have to do something about it and obviously since last session nobody is doing anything about it. Therefore I think that we ought to discuss it here on the floor now.

PRESIDENT: Senator Nichol.

SENATOR NICHOL: Mr. Chairman, members of the Legislature. I support the concept of the bill. I think that most of us do. I certainly don't think that this is the time to be doing it when we are winding down here with approximately 3 weeks left with a lot of important bills and some of them that haven't even been heard on General File, I don't think that this is the time to bring back an important bill like this at this
